Invest in the Future

Hudsonville Robotics is a competitive robotics program where students design, build, program, document, and present robots they create to compete against other teams. **Competition Drives Innovation**—challenging students to test ideas, solve problems, adapt, and continually improve. Local businesses can help strengthen that experience through financial support, volunteer time, and professional expertise.

SUPPORT THE PROGRAM

Financial contributions help provide robot parts, tools, equipment, opportunities, and other resources that keep students creating and learning. Hudsonville Robotics is a 501(c)(3) charitable program through Hudsonville Public Schools, and sponsorships of every size are appreciated.

SHARE YOUR TIME & EXPERTISE

Businesses can also contribute through mentors, event volunteers, technical expertise, career conversations, facility tours, or other hands-on involvement. Engineering, manufacturing, programming, skilled trades, project management, and business experience all have value to our students.

VOLUNTEER AS A JUDGE

Judges from area businesses play an important role in team development. Working in small judging teams, you'll meet with students to learn about their process. You do not need to be a robotics expert—we will walk with you throughout the process. It's a fun way to see the creative engineering minds of our students at work, meet professionals from other organizations, and yes, lunch is catered.

MEET THE NEXT GENERATION

Your involvement gives students a chance to learn from local professionals and discover the businesses and career paths available in their own community. At the same time, your organization gets a firsthand look at students who may someday become your interns, employees, engineers, programmers, technicians, or skilled tradespeople.

INTERESTED IN PARTNERING? Visit HudsonvilleRobotics.com or contact info@hudsonvillerobotics.com to learn how your business can support students financially, volunteer at an event, or share your expertise.	Hudsonville Public Schools – Robotics 3886 Van Buren St Hudsonville, MI 49426
